Quote by Shigeo Shingo, who was considered by many as the world's leading expert on lean manufacturing practices and the Toyota Production System.

"Are you too busy for improvement? Frequently,

I am rebuffed by people who say they are too busy and have no time for such activities. I make it a point to respond by telling people, look, you'll stop being busy either when you die or when the company goes bankrupt."

Honest, Direct, and Unbiased Expert Advisement.

For 20+ years, TDC has consistently proven to be the Go-to Expert for Reducing Costs and Improving the **Net Profits** for 100's of CMs. Providing Honest Assessments of all the Automated Equipment for Best ROI Performance. All this is achieved with No Equipment Vendor Referral Fees.

Willie Boyatt — VP Operations, Whitley City, KY

"The market and competition is growing more challenging, and we must stay competitive. Our truss plant was struggling in several areas, so we hired Todd Drummond to come in and assess our truss operation to help get us a game plan together to improve our operation and help us develop a growth plan. This investment was well spent because we learned so much in just a short time. Todd walked us through the things we needed to change immediately, why we needed to change them, and things we would need to change or improve as we grow. After the consultation, we went right to work changing the things he recommended, and the results have been a huge value increase in our operations. Thanks, Todd."

A Gain of Only One Net Profit Point Would Easily be More than 10x on the TDC Investment for Most Companies.
